TriSolver

CI failure triage

When CI goes red, most of the time goes on *sorting*, not fixing.

CATEGORY	CONF	ACTION
regression	97%	-> bob
dependency	97%	ping deps
config	97%	human
infra	97%	ping infra
flaky	51%	human

one red build, five kinds of failure, one agent dispatched

BLOCK `weakens_tests 0.95` `removed test(s): test_discount_applied`

the agent deleted the failing test to make CI green — caught automatically
